Purpose:

This document presents the findings referring to the tests carried out on the Israeli website for ordering food deliveries and self- pickup, “Just Eat” The tests were performed on the main functions of the site, which include operations such as viewing different menus, placing orders, etc.

Application Overview:

Just Eat, is a leading online marketplace designed primarily to streamline the food delivery process, connecting customers with a vast selection of local restaurants. While focusing mainly on food delivery. To provide maximum flexibility, Just Eat offers both convenient doorstep delivery and quick self-pickup options.

Optimization Proposals:

1. Implementation of a "Favorites" Feature

- Provide users with the ability to star or bookmark their Favorite restaurants and save them to a personalized list.
- **purpose:** Enhances user experience (UX) and boosts customer retention. Allowing users to save preferred locations streamlines the search and ordering process for future visits, making the platform feel more personalized and efficient.

2. Filtering and Removal of Unavailable Options

- Prevent the system from displaying items, options, or restaurants that are currently unavailable in real-time (e.g., out-of-stock dishes or closed venues), unless explicitly filtered as such.
- **Purpose:** Eliminates user frustration and ensures data integrity. Displaying unavailable options clutters the interface and needlessly extends the user's time-to-decision.

3. Localization and Multi-Language Support

- Expand the website's language options to include Arabic and Russian, building upon the existing English and Hebrew interfaces.
- **purpose:** Will make the platform accessible to diverse demographics within Israel who prefer navigating in their native language. Improved localization directly correlates with higher conversion rates and inclusivity.

4. Integration of a "Guest Mode" / Guest Checkout

- Allow users to browse restaurants and complete transactions as a guest, without forcing them to register or log in beforehand.
- **purpose:** Mandatory registration is a primary cause of cart abandonment; offering a seamless guest checkout accommodates quick transactions, with the option to create an account at the very end.

Testing tree:

- [BR-9] The "Fruit trays" filter cannot be selected
- [BR-10] The "Butcher" filter is not working
- [BR-11] Inconsistent capitalization pattern for two-word filters
- [BR-12] Logout button is missing from before entering credentials
- [BR-13] Email is not registered during Sign Up when using device Autofill
- [BR-14] Phone number is not registered during Sign Up when using device Autofill
- [BR-15] "Eco-Friendly" field is unclickable and disabled in the Preferences field
- [BR-16] Personal Area: User Name remains in Hebrew when language is set English
- [BR-17] Personal Area: Currency symbol is incorrectly positioned on the left side of the amount
- [BR-18] Account Settings: "Send me updates and deals from Just Eat" checkbox lacks destination details
- [BR-19] Account Deletion: 'Continue' button is too dark and lacks a hover effect
- [BR-20] Filters: missing options when resizing screen to half-window.
- [BR-21] Live Chat: Bot quick-reply options are displayed in Hebrew when site language is set to English
- [BR-22] Filters: Options disappear and become at 225% browser zoom
- [BR-23] "Grandpa Edward's sandwich" shop: "Contact the mushroom cream" doesn't have a picture

Bug Reports:

[BR-1] Verification message is ambiguous about delivery method and lacks expiration info

Created: 02/Jun/26 Updated: 02/Jun/26

Status:	To Do
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Low		

Attachments:	
Rank:	0 i00007:
Start date:	02/Jun/26

Description

Steps to Reproduce:

1. Navigate to the login page.
2. Enter credentials (Email address) for an existing user and proceed to the verification step.
3. Observe the verification screen text.
4. Wait 2 minutes before entering the received code.

Actual Result:

- The text says the code is sent to "email or mobile phone" (Unclear).
- There is no notice about a time limit.
- **Note:** Through 10/10 test iterations, the code was strictly sent to the mobile device and failed as invalid after 2 minutes.

Expected Result:

1. The UI should explicitly state exactly where the code was sent.
2. The screen must display a clear countdown or expiration notice

[BR-2] The field don't accept country codes like "+" and blocks letters and other special characters

Created: 02/Jun/26 Updated: 05/Jun/26

Digits only

☐ I've read and agree to the [Terms of Use](#) and [Privacy Policy](#)

☐ Send me emails with deals, coupons and special offers

Rank: 0|i0000f:

Description

Steps to Reproduce

1. Navigate to the registration.
2. Locate the **Phone Number** input field.
3. Enter a valid phone number starting with a plus sign.
4. Click outside the field or attempt to submit the form.

Expected Result

The system should accept the "+" prefix as a valid character for international phone numbers and successfully validate the input.

Actual Result

The validation triggers an error, preventing form submission, and displays the message: **"Digits only"**.

[BR-3] ["Terms of Use" required checkbox lacks mandatory indication, causing unexpected form submission failure](#) Created: 02/Jun/26 Updated: 05/Jun/26

Status:	In Progress
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Minor		

Attachments:	
Rank:	0j0000n:

Description

Steps to Reproduce

1. Navigate to the Sign-Up / Registration page.
2. Fill in all required text fields (Name, Email, Password) with valid information.
3. Leave the "Terms of Use and Privacy Policy" checkbox **unchecked**.
4. Click the **"Let's Go"** button to submit the form.

Expected Result

The registration form should either:

1. Clearly mark the checkbox as mandatory from the start .
2. Keep the "Let's Go" button disabled until all mandatory fields, including the checkbox, are filled/checked.

Actual Result

The form appears complete, but clicking "Let's Go" fails silently or triggers a late validation error, causing confusion and a poor user experience (UX).

[BR-11] [Inconsistent capitalization pattern for two-word filters](#) Created: 03/Jun/26 Updated: 05/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Minor		

Attachments:

Rank: 0|i00023:

Description

Steps to Reproduce:

1. Go to the **Filter** section/dropdown.
2. Observe the names of filters that contain two words.

Actual Result:

There is no consistent capitalization rule for two-word filters. Some filters have both words capitalized while others have the second word in lowercase. It currently mixes both styles.

Expected Result:

The system should follow a unified capitalization pattern for all two-word filters. We need to apply **one** of the following rules consistently:

- **Option A (Title Case):** Both the first and second words must start with a capital letter.
- **Option B (Sentence Case):** Only the first word starts with a capital letter, and the second word must be lowercase.

It should not be a mix of both.

2. Look for the "Log out" button before typing anything.

Actual Result:

There is no "Log out" button or option available to click. The button is completely missing from the window and only appears after the user enters their details/credentials.

Expected Result:

The "Log out" button should be visible and available immediately when the modal opens, allowing the user to disconnect right away without being forced to enter any information first.

[BR-13] Email is not registered during Sign Up when using device Autofill Created: 03/Jun/26 Updated: 05/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type: Bug

Priority: Medium

Reporter: [Emily Shevchenko](#)

Assignee: Unassigned

Resolution: Unresolved

Votes: 0

Labels: severity-Critical

Attachments:

Rank: 0|i0002j:

Description

Steps to Reproduce:

1. Open the **Sign Up** window to create a new user.
2. Use the device's **Autofill** feature to populate the email field.
3. Try to submit or move to the next step.

Actual Result:

The email address is not captured or recognized by the system. To make the site register the email, the user has to manually click inside the email input field again after autofilling it.

Expected Result:

The email field should successfully detect and register the input immediately when using the device's Autofill feature, without requiring the user to click inside the field again.

[BR-14] Phone number is not registered during Sign Up when using device Autofill

Created: 03/Jun/26 Updated: 05/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned

Description

Steps to Reproduce:

1. Open the **Sign Up** window to create a new user.
2. Use the device's **Autofill** feature to populate the phone number field.
3. Try to submit or move to the next step.

Actual Result:

The phone number is not captured or recognized by the system. To make the site register the phone number, the user has to manually click inside the phone number row again after auto filling it.

Expected Result:

The phone number field should successfully detect and register the input immediately when using the device's Autofill feature.

[BR-15] "Eco-Friendly" field is unclickable and disabled in the Preferences field

Created: 03/Jun/26 Updated: 05/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type: Bug

Priority: Medium

Reporter: [Emily Shevchenko](#)

Assignee: Unassigned

Resolution: Unresolved

Votes: 0

Labels: severity-Critical

Attachments:

Rank: 0|i0002z:

Description

Steps to Reproduce:

1. Open the **Filter** window.
2. Open the **Preferences** field.
3. Locate the **Eco-Friendly** option.
4. Try to click on it or toggle it.

Actual Result:

The “Eco-friendly” field is completely unavailable and cannot be clicked. It remains disabled/grayed out with no way for the user to interact with it.

Expected Result:

The “Eco-friendly” field should be fully functional, clickable, and available for the user to select or modify within the Preferences window.

[BR-16] Personal Area: User Name remains in Hebrew when language is set English

Created: 03/Jun/26 Updated: 03/Jun/26

Status:	In Progress
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Low		

Attachments:

Rank: 0|i00037:

Description

Steps to Reproduce

1. Log in to the website (default language : Hebrew).
2. Observe the User Name displayed in Hebrew in the top navigation bar / profile section.
3. Click on the language selector.
4. Change the language from **Hebrew** to **English**.
5. Observe the entire website layout and text switch to English.

Expected Result

The entire website, including the “User Name”, should transition to English to maintain UI consistency and aesthetics

Actual Result

The website language changes to English, but the User Name remains stuck in Hebrew, causing a broken and unesthetic mixed-language layout.

[BR-17] Personal Area: Currency symbol is incorrectly positioned on the left side of the amount Created: 03/Jun/26 Updated: 03/Jun/26

Status:	In Progress
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Low		

Attachments:	
Rank:	0 i0003f:

Description

Steps to Reproduce:

1. Log in to the application.
2. Navigate to the **Personal Area**.
3. Observe the positioning of the currency symbol relative to the number.

Expected Result:

The currency symbol should appear on the right side of the amount.

Actual Result:

The currency symbol appears on the left side of the amount.

[BR-18] Account Settings: "Send me updates and deals from Just Eat" checkbox lacks destination details

Created: 03/Jun/26 Updated: 03/Jun/26

Status:	In Progress
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Minor		

Attachments:	
Rank:	0 i0003n:

Description

Steps to Reproduce:

1. Log in to the application.
2. Go to **Personal Area**.
3. Go to **Account Settings**.
4. Locate the checkbox for approving updates and read the descriptive text.

Expected Result:

The text should clearly state the destination or channel of the updates.

Actual Result:

The text is vague and does not specify where the updates are sent.

[BR-19] Account Deletion: 'Continue' button is too dark and lacks a hover effect Created: 03/Jun/26 Updated: 03/Jun/26

Status:	In Progress
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Low		

Attachments:	
Rank:	0 i0003v:

Description

Steps to Reproduce:

1. Log in to the application.
2. Navigate to the "Personal Area"
3. Trigger the "Delete User" option to open the confirmation step.
4. Observe the visual style of the "**Continue**" button.
5. Hover the mouse cursor over the "**Continue**" button.

Expected Result:

- The button should follow the active primary button styling guides.
- The Hover Effect should occur when the mouse is over the button to indicate it is clickable.

Actual Result:

- The button remains static, dark, and changes its visual state almost invisibly upon hover.

[BR-20] Filters: missing options when resizing screen to half-window.

Created: 03/Jun/26 Updated: 03/Jun/26

Status:	In Progress
Project:	bugs reports

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Show_Stopper		

Attachments:

Rank: 0|i00043:

Description

Steps to Reproduce:

1. Log in to the application and navigate to the page containing the filters.
2. Resize the browser window to half-width (or open Developer Tools and set view to a smaller responsive width).
3. Observe the layout and alignment of the filter options.
4. Compare the available filter options with the full-screen view.

Expected Result:

The filter component should be fully responsive. When the screen is resized, options should either wrap cleanly, collapse into a responsive mobile-friendly filter menu (e.g., a "Filters" button or drawer), or remain accessible via horizontal/vertical scrolling. No options should disappear.

Actual Result:

The layout breaks, visual alignment is corrupted, and several filter options are completely cut off and missing from the screen: Kosher Free delivery, Discounts, New

[BR-21] Live Chat: Bot quick-reply options are displayed in Hebrew when site language is set to English Created: 03/Jun/26 Updated: 03/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Show_Stopper		

Attachments:

Rank: 0|i0004b:

Description

Steps to Reproduce:

1. Log in to the application.
2. Ensure the website language is set to **English**.
3. Click the Hi,"your name"
4. Click on the **Live Chat** icon to open the chat window with the bot.
5. Press the "send us a message"
6. Review the automated quick-reply options presented by the bot.

Expected Result:

The chatbot's quick-reply options and initial automated messages should be displayed in **English**, matching the user's selected website language.

Actual Result:

The chatbot displays options and messages only in **Hebrew**, creating a language mismatch.

[BR-22] Filters: Options disappear and become at 225% browser zoom

Created: 03/Jun/26 Updated: 03/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	severity-Show_Stopper		

Attachments:

Rank: 0|i0004j:

Description

Steps to Reproduce:

1. Log in to the application and navigate to the page containing the filters.
2. In the browser settings, increase the zoom level to **225%**.
3. Observe the layout of the filter options.
4. Attempt to access and select all available options that were visible at 100% zoom.

Expected Result:

At 225% zoom, the filter component should dynamically wrap or provide a scrollbar so that **all** options remain visible, accessible, and selectable.

Actual Result:

Several filter options are cut off, hidden from the screen, and cannot be scrolled to or selected.

[BR-23] "Grandpa Edward's sandwich" shop: "Contact the mushroom cream" doesn't have a picture Created: 03/Jun/26 Updated: 03/Jun/26

Status: In Progress

Project: [bugs reports](#)

Type:	Bug	Priority:	Medium
Reporter:	Emily Shevchenko	Assignee:	Unassigned
Resolution:	Unresolved	Votes:	0
Labels:	None		

Attachments:

Rank: 0|i0004r:

Description

Steps to Reproduce:

1. Open the application/website.
2. Navigate to the menu of restaurant "Grandpa Edward's sandwich"
 1. Search for the dish "Contact the mushroom cream"
 2. Observe the missing image asset for this item.

Expected Result:

The dish should display its dedicated, high-quality image as configured in the catalog.

Actual Result:

The dish is missing its image, showing only text and an empty space.
